Nicolas Desjardins

Web Developer

Technology is my passion. Programming is my language. Success is my legacy.
I built my first website in 2004 and never stopped sharpening my skills.

PERSONAL PROJECTS

My online portfolio: https://webman.dev (10/2021 - Present)

- Created an online portfolio for other projects and accomplishment. Also includes an extensive list of tools I am able to use. (Softwares, Operating Systems, Languages, etc)

Android Application: Paintball and Airsoft Companion. (2014 - 2014)

- Fully created and published an android application in JAVA. I had never previously used JAVA or Android Studio. This is just to show my love of learning and using new technology.

ACHIEVEMENTS

Created my own SME (Small and mid-size enterprise): PcSquad (2012 - 2018)

Managed financial and legal aspects of creating a business. Managed Marketing and Social Media. (SEO and SEM) Built website for online presence and marketing. Resolved hundreds of IT related problems from different clients. https://pcsquad.ca

Created my own SME (Small and mid-size enterprise): Webman Solutions (2016 - 2018)

Get new clients. Create websites and helped with early SEO and SEM for different clients. https://webman.solutions

Created an online inventory system (02/2019 - 06/2019)

Programmed a fully functional inventory web application using the MEAN stack(mongoDB, Express, Angular, Node.js). At that time I had never used that type of "tech stack" . Created full CRUD (create, read, update, delete) for clients and inventory.

Created custom CMS (content management system) (11/2018 - 03/2019)

Using Laravel PHP framework, I created an easy to use CMS to manage our online content and make even the technologically impaired people able to update content on our website.

Created custom Store Locator (11/2018 - 12/2018)

Using Laravel PHP framework and Google JavaScript API for Maps, I built a free store locator for our customers. Allowing us to cancel a subscription to an inferior, less customizable store locator.
